

Help bring your dentist into the Cigna Healthcare network

Know a dentist you'd like to see in-network?

If your dentist is currently out-of-network, you can recommend them for potential participation in the Cigna Healthcare® dental network.

Call **800-Cigna24** and provide your dentist's information. Once your information is received, Cigna Healthcare may contact the dental office regarding participation in the network.

To help us contact the provider, please have the following information ready:

- Dentist's full name
- Specialty
- Office address
- Phone number

What happens next?

Once your nomination is received, Cigna Healthcare will contact the dental office to discuss participation in the network.

Please note:

- Submission of a nomination does not guarantee network participation.
- Providers must meet all credentialing and quality requirements.
- Providers must be accepting new patients.
- Providers must accept Cigna Healthcare's standard fee schedule offered to other providers in their area.
